

## **Fantomaster team in partnership with bSeolized provided a new home for shadowMaker software.**

The infamous and world renowned shadowMaker software - grandfather and master of all enterprise level cloaking applications and cloaking software, as well as the only one ever to be mentioned by name in Google's terms and conditions - in partnership with fantomaster - has a new home with bSeolized shadowMaker. The development team at bSeolized shadowMaker, in strategic partnership with Fantomaster, the pioneers of stealth IP delivery technology, will focus on extending and improving the software cloaking technology and capabilities of fantomas shadowMaker.

Without a doubt the worldwide leader in cloaking software and technology, the decision of the Fantomaster team to partner with bSeolized has been made to take cloaking and IP delivery software to the next level. It provides the opportunity to allow extensive focus on the development and expansion of the current capabilities of the software.

For the past decade bSeolized shadowMaker has increased the success level of endless amounts of sites - providing them with highly optimized websites for hard to rank niches, keywords and key phrases. These recent developments will greatly enhance the effectiveness of the software. Extensive development plans are well underway and will address the ever evolving search engine algorithms to maximize your traffic. This partnership will insure that bSeolized shadowMaker will remain the leader in stealth and cloaking technologies in the decades to come - helping any business to succeed in the highly competitive world of search engine marketing.
